come out of the matrix

What should we Do?
What can we Do?
The money is broken!
Just look around
All prices (are) rising
But Income remains the same

can't you see
 doun't you care
 come out of the matrix
look around
 read between the lines
 it depends on you!

take your time to learn (take 100 hours)
if it's fun,
you don't notice it
join to the group
talk to each other
and you get it

all on debt
 nothing has value
 something is not right
the way out is simple
 but the impact is huge
 if you get it

21 million
there will never be more
that's basic requirement
Trust in math
Not in governments
Good money for the world

can't you see
 doun't you care
 come out of the matrix
look around
 read between the lines
 it depends on you!

see what's wrong That gives you power throw off the chains The way is you shows it to them Hodl Hodl – stack Sats
